QF130V Ventilator Fan

American Standard is pleased to announce the launch of our newest addition to the Ventilation product family. The EnviroWise QF130V is the industry's first 62.2 compliant inline fan that has a full ECM motor and intelligent logic built into the on-board controller. This means easier and less costly installation for dealers because of the elimination of balancing dampers and calculating static pressure between inlet and outlet of the fan. The QF130V is targeted for home builders or contractors who seek a cost-effective means of mechanical ventilation in new or existing homes up to 3000 square feet.

The EnviroWise QF130V is available for order now.

The first ship date is May 1, 2018.

Envirowise[™]
INDOOR AIR SYSTEMS

Features:

- Full ECM motor, adjustable airflow from 30 to 130 CFM. No balancing dampers required.
- Programmable onboard "Q" Controller to allow lockouts for temperature and humidity extremes
- On-Off switch on unit or control with 24V remote wired start thermostat with ventilation software
- Includes MERV 8 filter for improved Indoor Air Quality
- Quiet fan (.4 - 1.6 Sones) is virtually undetectable when operating
- Compact design fits between framing members and comes with hanger brackets
- Optional heater accessory for cold climate conditions
- Requires optional back-draft damper
