## » MODEL NUMBERS:

- ▶ See table

American Standard is pleased to announce new 5 ton air conditioner models. These models are equipped with new compressors in support of our commitment to continually improve the quality and performance of our products.

5 ton model features and changes include:

- ▶ New compressor model
- ▶ Capacitor change from two single capacitors to one dual capacitor
- ▶ Wiring diagram revision for the capacitor change
- ▶ Recommended Max Fuse size is 45 amps on all models (reduced from 50 amps)
- ▶ New Silver 13 AHRI system ratings will be visible in the AHRI directory by August 15, 2019

There are no changes to the Silver 14 and Silver 16 AHRI ratings or the cabinet dimensions. There are no changes to pricing on any new models.
