

**IMPORTANT DATES**

**First Production:**

See table

**First Ship:**

As Current Inventory is depleted

**Reason for Update:** There's an increased demand for compressors and to alleviate the capacity constraint, new compressors will be used in the models listed below which will change the current model numbers to a new model number. Using these new compressors will improve lead times and increase product availability.

**Important Notes:**

**Pricing Info:**

Available Now

- The models listed below will remain as scroll compressors. We are only changing supplier for these units to increase product availability
- There is no change in AHRI Ratings between the new and old models. AHRI ratings stop at the 9th model digit which is unchanged between the new and old models.

**Warranty:**

No change

- Replacement parts for the prior model are still active and valid in the system. Note the changed replacement part in the table

- Pricing between the new and old model numbers are the same.

**RATINGS:**

AHRI ratings available at [AHRIDirectory.org](http://AHRIDirectory.org)

- Please note the move to lower breaker/ fuse from Wire Harness and existing Compressor Model Number Change. The bulletin is just highlighting the move from Wire Harness to Lower Breaker / Fuse and the existing and new compressor model numbers.

**Model Change/ Updates:**

New/Prior	Current Production Model # (From)	New/Prior Model # (To)	Current Breaker (From)	New Breaker (To)	New Compressor Model	Production Start
New	A4AC4036A1000BA	A4AC4036A1000CA	30	30 (no change)	LBA029	9/15/2021
