

# 14 & 16 SEER Compressor Changes

eAPB2138 | Nov. 19th, 2021

## IMPORTANT DATES

### First Production:

Dec. 20th, 2021

Increased demand is placing strain on compressor supply. To ensure stable production and to improve product lead times, we will be using different compressors in the model numbers in the grid below. These new compressors have a higher availability and will help alleviate some capacity constraints.

Note the new model numbers listed below:

### First Ship:

Will begin after current inventory has been depleted.

Current Production Model # (From)	New Model # (To)	Replacement Part Number	Production Start
4A7A4030L1000AA	4A7A4030L1000BA	COM12773	12/20/2021
4A7A4031L1000AA	4A7A4031L1000BA	COM12773	
4A7A6030J1000AA	4A7A6030J1000BA	COM12773	

### Sales Literature:

Available

### Important Notes:

- There will be no change in AHRI Ratings between old and new models. AHRI ratings stop at the 9th model digit which is unchanged between the new and old models.
- Replacement parts lists are complete and available in the system.
- Pricing between the new and old model numbers are the same.

### Technical Literature:

Available

### Pricing Info:

Available

### WARRANTY:

No changes
