Available Now

FIRST SHIP:

December 9, 2020

WARRANTY:

Limited Warranty Period:

10 Years

Commercial Applications:

10 Years

RATINGS:

» AHRI ratings available at AHRIDirectory.org

American Standard is proud to announce the New Ultra Low Ambient Multi Zone system. Multi-zone systems allow the most flexibility when customizing a comfort system for your home and can provide the benefits of a zoning system without the costly additions of zoning hardware. Up to five indoor units with separate temperature zones can be connected to one outdoor unit, improving comfort and saving energy.

Multi-zone heat pumps are an affordable and energy efficient way to control the climate of individual rooms. No energy loss due to air leakage in ductwork from heating or cooling the entire duct system before the air reaches desired rooms. No expensive ductwork required. The multi-zone system adjusts to your needs, providing constant comfort and energy savings.

New Multi Split Outdoor units match with all current Multi Zone indoor units:

- Slim Duct (pancake AH) (4MXD85xxx)
- Cassette (4MXC85xxx)
- High walls: 23 Series (4MXW23xxx)
38 Series (4MXW38xxx)
- Floor or Ceiling convertible (4MXX85xxx)
- Console Unit (4MXF85)

Broad Operating Ranges

Cooling - -18C to 46C
Heating - -35C to 24C

Gold Fin coating gives 3x the industry standard protection against corrosive environments

- Inverter Rotary DC Compressor

Model	SEER/HSPF (Btu/h)	EER (Btu/h)	Cooling Capacity (Btu/h)	Heating Capacity (Btu/h)	Dimensions
4TXM2330A	23/ 10	11	32,000	36,000	42.8 x 17.3 x 43.4
4TXM2336A	23/ 10	11	37,000	42,000	42.8 x 17.3 x 43.4
