eAPB2037 | January 18, 2021

IMPORTANT INFO

Pricing:

Available now*

*There will be no changes in 2020 price between old and new models. 2021 price increases will apply to orders with a request date beyond 12/31/2020

First Order:

December 15, 2020

American Standard is incredibly excited to share the details on upgrades within the S8B1, S8X1, and S8X2 families. As of December 9, 2020, the models listed in the chart below include a new, improved heat exchanger design. This design is perfectly optimized to reduce burner operating noise in both liquid propane (LP) and natural gas applications.

The chart below details the models that are phasing out with these changes, as well as the models that will replace them. Orders will be superseded to the new model as units become available. Orders placed on models that are phasing out will be fulfilled based upon unit availability.

All models are subject to current lead times.

Remaining models in the S8B1, S8X1, and S8X2 families will receive a similar design upgrade in April of 2021.

Update: As of January 18, 2021, S8X2, 17.5", 80,000 BTU/h models contain the upgraded heat exchanger design.
