

eAPB2012: UPDATE: ACCUCLEAN™ MODEL NUMBERS

BUILT TO A HIGHER STANDARD™
American Standard®
HEATING & AIR CONDITIONING

eAPB2012 | MAY 28, 2020

It has come to our attention that the AccuClean™ Model Numbers in the 2020 product handbook do not reflect the current model numbers for the product. The Indoor Air Quality section of the product handbook was updated in December 2019 in preparation for printing in early January 2020. In regards to AccuClean™, we included the new model numbers that now won't be available until later this year. The current models available for order are still the same AFD model numbers you're used to. We've attached the correct product handbook pages for the current product. We are making some changes to the door design which will be coming later this year along with the model number changes, so please look for future updates on our AccuClean Product.

Continue selling the same great American Standard AccuClean™ that has been delivering revolutionary clean air since 2006!
