

Outdoor Model Numbers Temporarily Suspended

eAPB2110 | MARCH 16, 2021

To streamline operations and maximize production capacity, the following models will be suspended through the end of 2021. These represent the lowest volume models in our offering and we hope that the disruption will be minimal as we are ramping up our production capacity for this cooling season. We apologize for the inconvenience these changes may cause and will issue a notification once production resumes.
