

Geothermal Phase Out Update

eAPB1838 | December 14, 2018

In a continuing effort to keep the channel informed, we are releasing a final announcement on the phase-out of the geothermal heat pump product line and important dates to remember:

- Transition of the business relationships between American Standard distributors/dealers and WaterFurnace is taking place on an individual basis. If there are any questions or if a distributor/dealer introduction still needs to be arranged, please contact your Regional Sales Manager or contact Jay Ayers
- **The last order date for Envirowise geothermal equipment through ASDealerNet is Friday, December 14, 2018.** All orders are scheduled to ship by the end of the year. All future orders will be directed to WaterFurnace subject to their terms and conditions.
- Reminder, the TAMG Air Handlers that are labeled “Envirowise” are being phased out along the rest of the product families. This means that the TAMG Air Handler will not be rated in the future with the WaterFurnace brand units and will be removed from the AHRI listing for Energy Star Tax Credits.

The impacted models are:

Air Handler Model Family	Geothermal Model Number	EnviroWise Matching Heat Pump
TAM9	TAMGB0A24V21DA	T2GN / GE 026
TAM9	TAMGB0C36V31DA	T2GN / GE 038
TAM9	TAMGB0C48V41DA	T2GN / GE 049
TAM9	TAMGB0C60V51DA	T2GN / GE 064

We still have inventory of two finished goods units that are offered for sale at our cost. The units are:

- **TVGX036 and TVGX060**

If there is interest in purchasing these units, please contact patriciam.brothers@irco.com
