

Product Elimination: TAM4 and GAF2 (select models)

eAPB2031 | October 28, 2020

IMPORTANT DATES

Last Order Date:

October 29, 2020

In order to help us focus on meeting the growing needs of our core air handling products, we are eliminating manufacturing and supply of some air handlers with low volume. The impacted air handlers are the **TAM4**, and **two models** from the GAF2 (**GAF2A0A18S11EE** and **GAF2A0A36S31EE**). These product rationalizations will help us focus on core products and meet growing needs on those products.

The effective last order date will be **October 29** for both products. All existing orders and backlog will continue to be manufactured in Vidalia, GA.

As we transition out of these air handlers, the table below was created as a guide for air handling solutions to meet future needs. There may be some dimensional differences in some models, we recommend reviewing the full technical information on AsDealerNet.

RATINGS:

» AHRI ratings available at AHRIDirectory.org

Current Air Handler	Alternative Air Handlers	
TAM4	GAM5	TEM4
GAF2	GAM5	TMM4/5

We expect these changes will enable us to better serve you and your customers through improved availability and service levels.
