Residential Solutions products are assembled from a combination of fabricated, purchased and assembled components. The fabrication processes require the use of specialized equipment, machines and dies to form, spin or draw metal sheets or coils, needed for the final product. Those components are incorporated with purchased components into various assemblies to create each unique product. For all products offered, the design, fabrication, assembly and shipping processes are done at Residential Solutions manufacturing facilities located in Tyler, TX, Trenton, NJ, Vidalia, GA, Ft. Smith, AR, Lynn Haven & Panama City, FL, & St. Louis, MO.

Currently, the following American Standard models, central air conditioning and heat pumps, air handlers, gas-fired furnace, coils and packaged models are **“Assembled In The United States of America!”**

Outside of the United States, please place information here required legally where appropriate. For example, a number of counties by law require certain specific information to be stated on the letterhead such as a company’s full legal name, a company registration number, and/or an identification number. You should check with your local controller or HR representative to be sure your letterhead is in accordance with local regulations for the relevant Ingersoll Rand company.
